## SUMMARY

Detail-oriented Data Analyst and Business Intelligence Developer with hands-on experience in SQL, Python, Power BI, and ETL pipeline development. Fourth-year Statistics student at Menoufia University (GPA: 3.0) with proven ability to transform complex datasets into actionable insights. Skilled in designing data warehouse solutions and delivering actionable business insights through data analysis.

## EDUCATION

**Menoufia University — Faculty of Business**  
**B.Sc. Finance (Level 3) — GPA: 3.0**

Menoufia, Egypt  
Aug 2023 – Jul 2027

## PROFESSIONAL EXPERIENCE

**FlyRank AI**

Chicago – United States (Remote)

**Machine Learning Engineer Internship**

Jun 2026 – Present

- Collaborate with cross-functional teams to design, develop, and optimize scalable Machine Learning and Deep Learning models.
- Cleaned and preprocessed large-scale datasets to develop efficient, production-ready data pipelines.
- Assist in deploying models into production and integrating them via APIs.

**Digital Egypt Pioneers Initiative (DEPI)**

Egypt

**Data Analytics Specialist — Ministry of Communications and Information Technology (MCIT)** Jun 2025 – Dec 2025

- Prepared and transformed large-scale datasets of 2M+ rows using SQL and Python to extract key business metrics and ensure data readiness for analysis.
- Designed and maintained 20+ interactive Power BI dashboards to track KPIs and support data-driven decision-making across business units.
- Implemented rigorous data cleansing and transformation processes to maintain consistency and integrity across multi-source datasets.

**Information Technology Institute (ITI)**

Egypt

**Business Intelligence Development**

Aug 2025 – Sep 2025

- Completed 120-hour intensive BI training program; designed and implemented data warehousing solutions using dimensional modeling and star schema design.
- Optimized SQL queries for efficient data retrieval, reducing query execution time through indexing strategies and query restructuring.
- Built 5+ BI reports and dashboards integrating multiple data sources for management reporting.

## TECHNICAL SKILLS

**Languages & Querying:** SQL (PostgreSQL, SQL Server) · Python (pandas, NumPy, scikit-learn, Matplotlib, Seaborn)

**BI & Visualization:** Microsoft Power BI (DAX, Power Query, M Language) · Advanced Excel (PivotTables, VLOOKUP, Power Pivot)

**Machine Learning:** Predictive Modeling · Regression Analysis · Random Forest · Statistical Analysis · Hypothesis Testing

**Data Engineering:** ETL Pipeline Development · Data Warehousing · Dimensional Modeling · Data Cleaning · Data Governance

**Finance & Analytics:** Financial Analysis · Financial Forecasting · Budgeting & Reporting · Risk Analysis

SOFT SKILLS

---

Analytical Thinking · Problem Solving · Communication · Team Collaboration · Attention to Detail · Adaptability

PROJECTS

---

English Premier League Performance Analysis (2018–2023)

Tools: SQL · Python · Power BI · pandas · Matplotlib

- Analyzed 5 seasons of EPL performance data to extract KPIs, identify trends, and generate insights for coaches, analysts, and sporting directors.
- Built interactive Power BI dashboards visualizing player performance, team statistics, and match outcomes across 380+ games per season.
- Queried and transformed 10,000+ match records using SQL and Python to create a unified analytical model.
- Improved dashboard usability and reporting efficiency by consolidating data from multiple sources into a single interactive reporting solution.
